

# 0907 - 회원 웹 기능 - 홈 화면 추가

## HomeController

```
package hello.hello_spring.controller;

import org.springframework.stereotype.Controller;
import org.springframework.web.bind.annotation.GetMapping;

@Controller
public class HomeController {

    @GetMapping("/")
    public String home() {
        return "home";
    }
}
```

## home.html

```
<!doctype html>
<html xmlns:th="http://www.thymeleaf.org">
<body>

<div class="container">
    <div>
        <h1>Hello Spring~</h1>
        <p>회원 기능</p>
        <p>
            <a href="/members/new">회원가입</a>
            <a href="/members">회원 목록</a>
        </p>
    </div>
</div>
</div>
```

```
</body>
</html>
```

<http://localhost:9904/>

## Hello Spring~
